

Encrypt and Backup Wallet

NASDAC Crypto Coin

What you will need:

- Desktop or Laptop
- USB drive

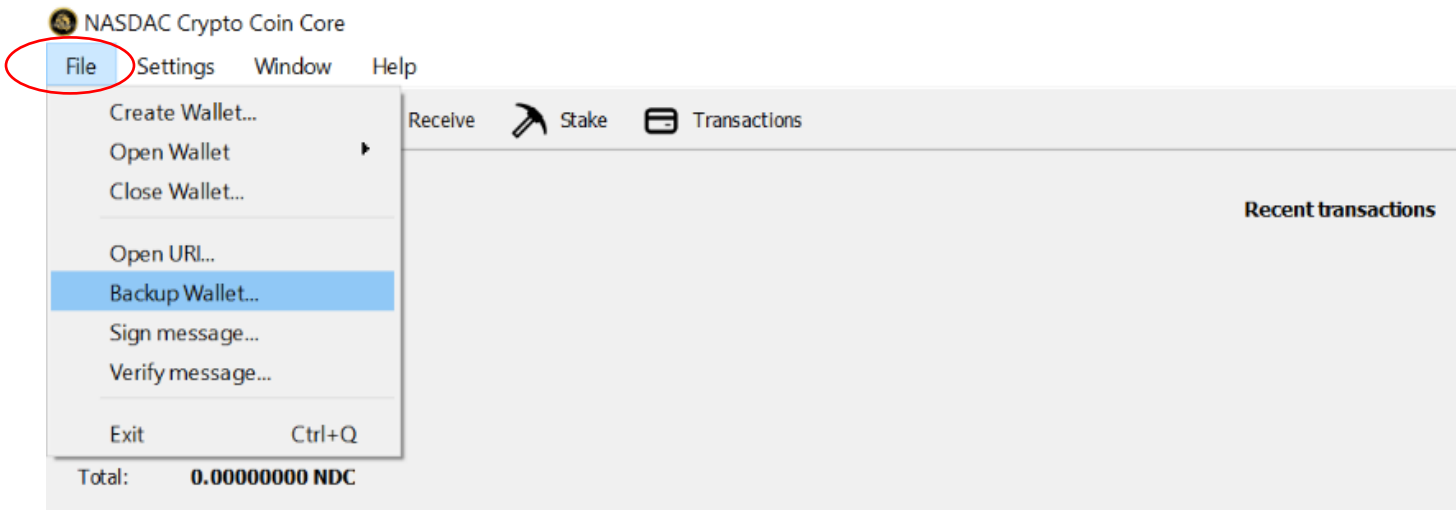

1. Click on Settings -> then click on Encrypt Wallet

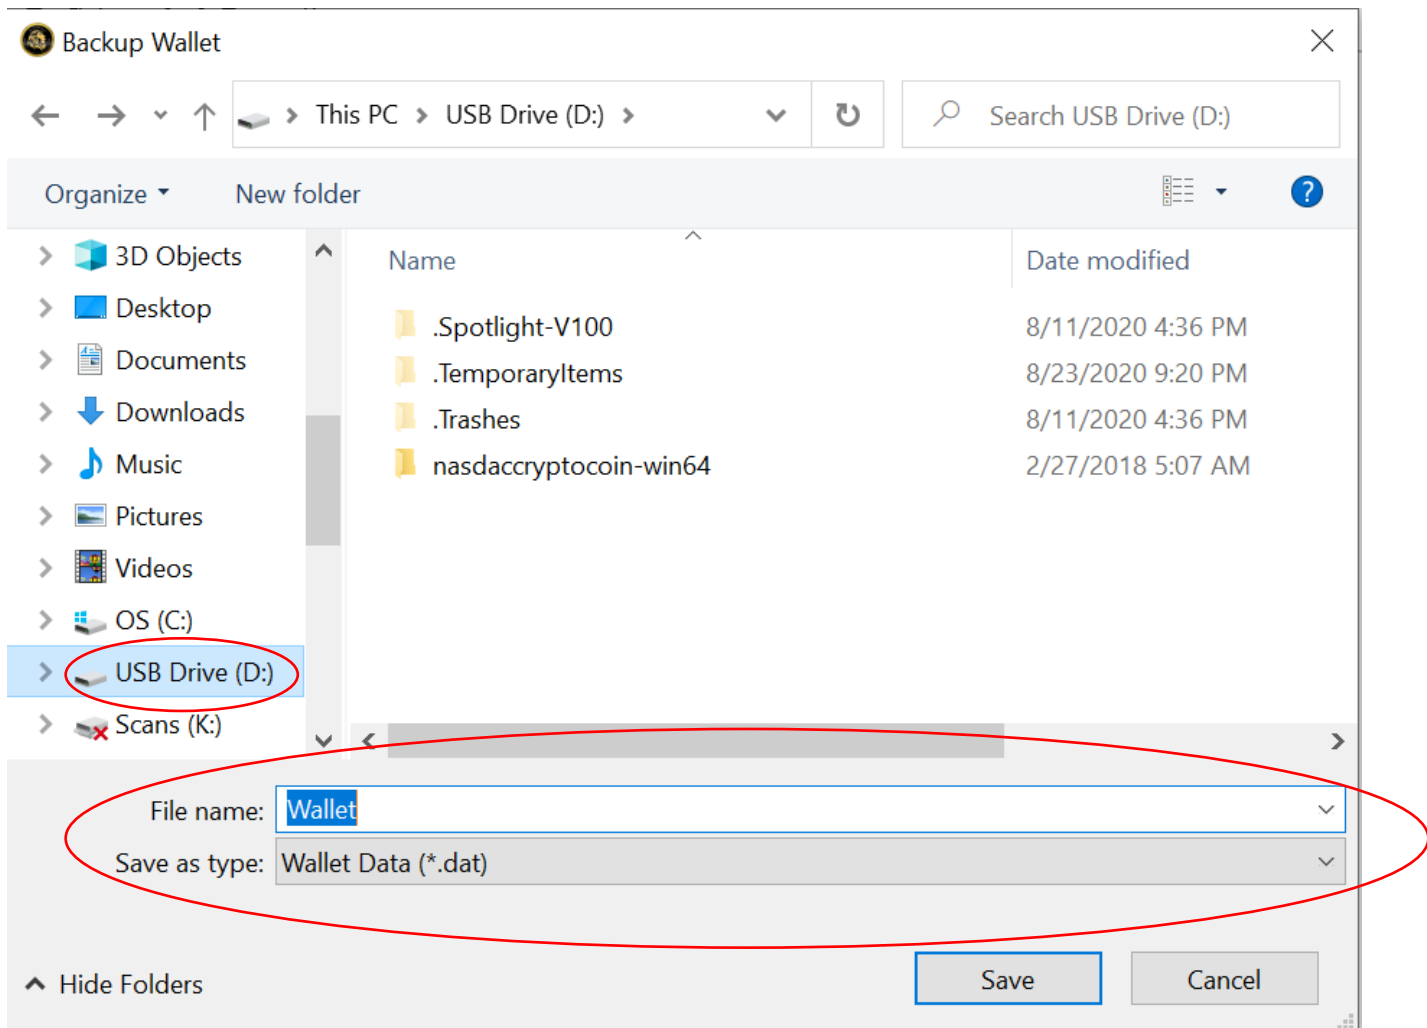

2. You will need to create a password for your Desktop Wallet.
***DO NOT LOSE THIS PASSWORD. IF YOU LOSE THIS PASSWORD, YOU WILL LOSE ALL OF YOUR NASDAC CRYPTO COINS (you may want to write this password down so that you do not forget it)**
3. Once you create your password, click 'OK'. It will ask if you are sure that you want to encrypt your wallet. Select 'Yes'
4. You should get a notification saying that your wallet is now encrypted. Click 'OK'

Back up Wallet

5. Go to File -> then click on Backup Wallet

6. You should see a window that is similar to the image below. Insert your USB drive if you haven't already. Make the File Name 'Wallet' and make sure you are saving to your USB drive (as shown below)

7. Once you click save, you should see the notification pop up that says Backup Successful
***NOTE: You should Backup your wallet at least once a week (to do this, repeat steps 20-22)**
